

## Civil Structural Engineer - Stein

[Apply Now](#)

Company: Fluor Corporation

Location: Netherlands

Category: computer-and-mathematical

### Job Description

Fluor Consultants BV is focusing on developing long term relationships with customers in revamping, debottlenecking and expanding the production capacity of their existing facilities including projects driven by the energy transition and sustainability, in the process industry, in the southern part of the Netherlands. Our offices in Bergen op Zoom, Rotterdam and Stein offices provide the full portfolio of project execution services: from conceptual engineering through commissioning and construction support.

The Civil Structural group is a dynamic team in which engineering, design and leadership skills are combined to effectively support our clients. In addition to a solid education focusing on engineering and/or design, a strong set of personal competencies is a prerequisite for success. Being a team player and having an ability to interact effectively with client's organization and others disciplines in our taskforce is essential.

The Civil Structural Engineer will be responsible for Civil and Structural Engineering and Design services for a large variety of brown field and revamp facilities for petrochemical, oil, chemical gas and industrial services. These services comprise of conceptual design, project specifications, basic engineering, extend basic engineering and detailed design and engineering.

In addition, regular contact with Client and or Owner representatives, consultants, specialist, vendors and construction contractors for coordination, classification and guidance regarding CSA design, engineering and construction activities.

### Key Responsibilities

- . Demonstrate and maintain effective Client relationships, as Fluor's representative.
- . Maintain effective relations with other disciplines and provide guidance/assistance to younger engineers.
- . Communicate, both verbally and in written form in a professional manner, using email, letters, and minutes of meeting and/or reports.
- . Prepare man-hour and material estimates, and monthly budget reports for all engineering efforts.
- . Travel, as required, to ensure the successful execution of project and/or department goals
- . Perform technical bid evaluations of received bids of suppliers.
- . Perform checks of vendor documents and checks of drawings from other Fluor disciplines.
- . Multi-disciplinary project requires pro-active attitude and basic knowledge of other disciplines such as piping and mechanical.

Fluor can offer:

- . Competitive salary package including a variable profit sharing
- . A fiscal maximized defined contribution pension scheme
- . A flexible work arrangement with the possibility to work from home and save additional vacation days on top of the regular paid vacation days
- . An excellent insurance package in addition to the Dutch social security
- . Excellent development opportunities in a dynamic international project environment

### Basic Job Requirements

- . 8-15 years of work-related engineering and design experience.
- . Has good theoretical and practical knowledge of civil, structural and geotechnical structures and engineering.
- . Practical field and construction experience.
- . Perform calculations for foundations, concrete, and steel structures with computer analysis software, preferable SCIA engineer.

- . Is able to interpret geotechnical reports.
- . Understanding of pertinent design codes (Eurocodes, NEN8700 serie) and government regulations and industry practices.
- . Experience with FEED/Basic projects as well as detailed design project execution.

### To be Considered Candidates:

Must be authorized to work in the country where the position is located.
