

E&CS Lead Engineer - Office Stein

[Apply Now](#)

Company: Fluor Corporation

Location: Netherlands

Category: computer-and-mathematical

Job Description

Fluor Consultants BV is focused on developing long term relationships with customers in revamping, debottlenecking and expanding the production capacity of their existing facilities in the Process Industry in the South West and South East of the Netherlands. Fluor provides the full project execution services: from conceptual engineering through commissioning and construction support.

The Electrical & Instrumentation & Control system group is a dynamic team in which engineering, design and leadership skills are combined to effectively support our clients. In addition to a solid education focusing on engineering and/or design, a strong set of personal competencies is a prerequisite for success. Being a team player and having an ability to interact effectively with client's organization and others disciplines in our taskforce is essential.

In these projects, the lead engineer takes responsibility for the E&I&CS functionality for one or more projects in the oil, gas and (petro-) chemical industry. Leading 4-10 people and supported/coached by a senior engineer the lead engineer works within a task force for the realization of multi-discipline projects in close cooperation with other disciplines, vendors and clients to translate functional specifications into technical solutions.

For our office in Geleen we are looking for an experienced E&CS Lead Engineer.
