

Electrician in the Automotive

[Apply Now](#)

Company: AWL-Techniek

Location: Netherlands

Category: architecture-and-engineering

We are looking for a driven Electrician with a passion for high-tech mechanical engineering. With skill and precision, you will take care of the electrical assembly of components, sensors and cabling in our automotive machines, always with an eye for the highest quality standards because that is what we stand for!

From single welding cells to complex automated production lines, you can take on any challenge!

But that's not all! Together with our enthusiastic project team, you will ensure that our machines are transported flawlessly and commissioned successfully at locations all over the world.

In this independent position, you will be part of a dynamic project team with various disciplines that work well together.
