Engineer

[Apply Now](#)

Company: Temporary Works Design

Location: Netherlands

Category: computer-and-mathematical

Are you ready to bring simple solutions to complex construction challenges? Do you enjoy working together with other ingenious and ambitious young people? Do you have great communication skills, a sense of responsibility, and are you ready to make a difference in your projects? If the answer is yes, then we are looking for you!

TWD – A fun challenge to be part of

At TWD we love to create construction methods and design installation tools. We achieve creative, simple, and efficient solutions through committed teamwork. Thanks to our main pillars – fun, development, and happy clients – we grow at a rapid pace with over 200 talented people in four locations: Rotterdam, London, Athens, and Taipei.

Every day we contribute to the energy transition and key infrastructure projects worldwide. We do this by offering innovative design solutions to our clients, mainly in the offshore wind and heavy civils industry. Our no-nonsense, informal working environment offers you the opportunity to share your enthusiasm for engineering and work together with other passionate Engineers and Designers in the field.

To further strengthen our team in Rotterdam and realize our mission to contribute to a better world by making construction easier, we are looking for **Engineers** !

What you will do

As an Engineer at TWD, you design unique structural and mechanical installation tools for a wide variety of on- and offshore construction projects. A glimpse of your responsibilities:

Translating your client's requests into functional designs

Elaborating sketches and ideas into calculations (using free-body diagram)

Performing the technical set up and execution of detailed calculations and reports

Keeping overview of the link between calculations and drawings

Safeguarding the technical quality and timely delivery of project deliverables

Managing your own project deliverables

Of course, your job is not set in stone. You are encouraged to define for yourself which tasks are required to meet these responsibilities. The same holds for your development. We highly value your (career) development and encourage you to take the lead. You will develop yourself on-the-job, but you can also follow relevant workshops and/or training to acquire the knowledge and skills you are interested in or need in your job.

Curious about the type of projects you will be working on? Check out this video!

Who you are

We are looking for smart and eager people with a practical backbone and the following profile:

You have a bachelor's or master's degree in a technical field

You are a passionate, quick learner and have strong technical insight

You are a communicative team player

You are flexible and able to come up with ingenious solutions

You are enthusiastic, self-driven, and eager to work in an entrepreneurial environment

You have a sense of responsibility to get the job done

What comes along with working at TWD

At TWD we work hard to deliver quality and finish our projects in time. We believe a stimulative company culture with enough room for fun and development motivates our people to do so. That is why working at TWD also means:

Working in an exciting industry that contributes to the energy transition and key infrastructure projects worldwide

An open, young, diverse, and supportive working environment

Professional and personal development opportunities with many internal workshops

A healthy and sustainable lunch, including fresh fruit

A fun and amazing company trip each year

Friday afternoon drinks and special TWD events such as pub quiz, lady's night, or drinks and dinner
