

## ERP Functional Analyst Finance

Apply Now

Company: TriFinance

Location: Netherlands

Category: computer-and-mathematical

**Whatever your ambitions, TriFinance gives you every opportunity to achieve them**

Here, you'll work every day on projects that tie in with your growth plans. And you'll continue to make strides in an environment built around active knowledge sharing, coaching, and mentoring. In sum: we provide the opportunities; you show the ambition to grasp them.

Sounds good, you say? Well then, we already want to meet you!

Are you an ambitious finance professional with the ambition to work **Pragmatic Advisory & Implementation** consultant in ERP projects? Not thinking in application functions and features but in **business processes** that require the appropriate system support? Are you an advocate of positive change, not just any change but solutions that really work?

As a **ERP Functional Analyst Finance**, you will engage in implementing ERP solutions **at the client's end**. But your role may also involve major upgrades, roll-outs, support, improvement projects, or even rectifying failed implementations. Your focus will be on challenges that resonate with you.

You build the **bridge between the customer's finance users and the financial application consultant of the system integrator**.

You design the **new financial business processes**, understand software capabilities and configuration settings, gather and interpret user needs, question practices, identify problems and opportunities, propose alternatives and build consensus on the solution.

**Working with application consultants** to configure the software, assisting with requirements definition for customizing, training and supporting key users in executing software testing,

documenting and end user training.

If your ambition lays beyond finance, we can offer you **growth path** progress in a generalist role. Or you can grown into an expert role in one of our domains. Whether you prefer a diverse range of responsibilities or specializing in a specific area, we support your career growth in both directions.

Flexibility is Key! With projects spanning Flanders, we strive to find the optimal match, considering both content and location. We value and appreciate you flexible mindset, thats why we consistently engage in conversations with our clients about incorporating hybrid working arrangements.

You have at least 5 years relevant experience **in ERP environment** ERP can be SAP, Microsoft Dynamics Business Central (BC) or Finance & Operations (F&O) or older versions of the above like NAV, Navision, AX, Axapta.

You may have experience as a financial consultant on the system integrator side and are now looking to transition to the business side to further develop your ambitions in that domain. Alternatively, if you have a background in the business side, it would be advantageous to have been involved in ERP implementations and/or migrations.

You are totally into ERP; you want to grow your ambition as consultant – from operations to projects.

You speak Dutch and can express yourself well in English. Knowledge of French is a plus.

Are you as excited as we are about the challenge outlined above? Convinced that you are the one we are looking for? Reach out to our recruitment team to get to know each other! Just ask our people: because everything at TriFinance centers **your growth** we're happy to review with you what direction you want to take. We also invest heavily in inspiring training courses, active coaching, and fun events for colleagues. All in an open culture where TriFinance colleagues share their knowledge and help each other get ahead. You can also count on a **versatile salary package** Besides **competitive salary** it includes:

a company car (Mini/BMW) with fuel card

a smartphone with subscription

a net expense allowance

meal and eco vouchers

group and hospitalization insurance

flexible working hours

32 vacation days

an attractive cafeteria plan.
