Company: Aquablu

Location: Voorhout

Category: other-general

About the job

As a Financial Controller, you will play a pivotal role, offering strategic financial insights and innovative solutions to drive optimal decision-making for our company and clientele.

Key Responsibilities:

Strategically assess the financial requirements of the organization, both in terms of operations and commercial aspects, to enhance overall performance.

Conduct comprehensive analyses and provide recommendations for streamlining business processes, considering holistic enhancements across various functional domains.

Foster the exchange of best practices, promote collaboration, and leverage financial tools, methodologies, and expertise across the business landscape.

Shape and execute the Internal Control roadmap for Aquablu, ensuring adherence to financial governance and compliance standards.

Planning, supervision, and execution of internal audit and control initiatives, maintaining the integrity of financial operations.

Relationship management: maintaining relationships with stakeholders within and outside the finance domain.

Work closely with our operations team to teach them the processes you create; monitoring and improving those processes over time.

Sound interesting? Great! Let's continue.
