

Full time Data Scientist Position (Machine learning, Ai)

[Apply Now](#)

Company: GeoSignum

Location: Delft

Category: computer-and-mathematical

Data Scientist

GeoSignum is currently looking for a highly skilled and enthusiastic team member who has a background in computer science, applied mathematics, Geomatics/geo-informatics, computer vision, Informatics, Artificial Intelligence or similar fields.

About Us

GeoSignum is a high-tech start-up company based in Delft and member of the YES!Delft business incubator. GeoSignum develops unique software solutions to automatically detect, extract and map geographical objects and features from 3D LiDAR datasets captured from various platforms (Mobile or Airborne) using the state of the art 3D computer vision, advanced data processing and machine learning techniques.

About you

We are looking for a Data Scientist with a Master's or PhD degree with a background in computer science, applied mathematics, Geomatics/geo-informatics, Informatics, computer vision, artificial intelligence or similar fields.

Requirements

Experience with LiDAR and 3D laser data processing techniques. You should have a strong analytical, mathematical (3D geometry, numerical methods, algorithms) and coding skills, with the ability to work in a team in a high-tech start-up environment. Your main responsibility will be designing, developing and/or optimizing stochastic and machine learning models for LiDAR datasets. Contribute to developing new data mining, machine learning solutions and methods.

Skills

The ideal candidate will have:

Affinity with C++ or Python.

Strong understanding of data structures and algorithms.
