## Logistics Coordinator - All Levels opportunities in Netherlands

[Apply Now](#)

Company: SBM Offshore

Location: Schiedam

Category: other-general

### RESPONSIBILITIES

You build partnerships with vendors to meet shared objectives as per Company requirements and in line with the local and international regulations. You interface with internal and external third-parties involved in expediting, inspection, logistics and material control activities (ie: agencies, freight forwarders, customs or other officials).

In addition:

Provide input in the project schedule with respect to transport methods and durations.

Handle, plan and manage out of gauge special shipments on a competitive basis. Witness loading/unloading if necessary.

Communicate with the project procurement manager, project buyers and inspectors to ensure proper planning and timely transport.

Liaise with the freight forwarders in regards to transportation methods (Trucking, Courier, Air & Ocean shipments) and customs formalities from our worldwide suppliers to final destinations.

Request & negotiate quotations from multiple forwarders on oversized or heavy shipments to ensure the best rates & arrival dates.

Influence PM's & PPM's to make timely & cost effective decisions in regards to my shipments/projects.

Liaise with site to ensure arrival of purchase orders to final destination.

Ensure all shipments information is consistently updated in Nadia so our team is able to check & receive our cargo upon delivery to site.

Develop transportation and/or heavy lift plans in line with specific project requirements.

Source potential forwarding agents and participate in negotiations of forwarding and heavy lift contracts.

Assist in establishing short & long term objectives with respect to existing and planned contractual obligations.

Continual support to project teams of all transportation requirements for final and urgent materials to ensure completion.

Approve freight forwarder's invoices per the contract(s) or quotations

## **REQUIREMENTS**

Qualified candidates should possess at least a Bachelor's degree from a University, Engineering, or Commercial School and have 7+ years of previous project logistics experience. Must have good knowledge of contract, tax, and logistics issues. Periodic travel for customer and vendor contacts or for site support may be required.

Furthermore you are or you have:

Logistics experience in EPC projects

Expert knowledge of INCOTERMS

A self- starter who possesses good interpersonal and organizational skills;

Great Time Management skills;

Leadership skills and proactive behavior;

Flexible and adaptable to react to operational changes;

Willingness to travel;

Fluent in English (both written and verbally).

## **WHAT WE OFFER**

What do we offer? We offer you a job with a high level of diverse tasks and responsibilities in an international concern that highly values the development of its employees, quality and safety. You get the freedom to take a range of responsibilities in a rapidly evolving environment. In addition, we offer you a competitive salary package and challenging opportunities for growth.
