

Mechanical Engine Expert

[Apply Now](#)

Company: Trinamics

Location: Netherlands

Category: architecture-and-engineering

Introductie

Are you an experienced Product Development Engineer with experience in Automotive and Engine development? Are you open for a new job in the Netherlands? This will be the role you are looking for.

Functieomschrijving

The department Base Engine is responsible for the hardware development of new engines and maintaining the in-production products.

Base Engine is responsible for Rotation Parts inside the base engine, like the Cranktrain system/component incl. Piston/Liner, the gear train, camshaft, oil pump but also seals, gasket, bolts and the exhaust manifold.

As the Mechanical Expert in this role, your duties will include:

Coordinating the development of new designs or enhancements to existing ones in collaboration with internal stakeholders across various departments and external suppliers.

Leading Simultaneous Engineering (SE) teams.

Translating project objectives into product requirements and collaborating closely with suppliers to develop the design.

Managing all necessary Design for Six Sigma (DFSS) deliverables throughout the project.

Implementing problem resolution strategies following the DMAIC principle.

Initiating, coordinating, and monitoring validation plans and releases in alignment with

project milestones.

Ensuring that components meet requirements with a focus on functionality, reliability, quality, robustness, and manufacturability.

Analyzing results and making detailed technical proposals, including presentations to management.

As the Mechanical Expert, you will report to the Supervisor of the respective group.

Wat verwachten we van jou?

Bachelor's or Master's degree in Mechanical or Automotive Engineering.

Minimum of 3 years of experience in mechanical/hardware roles within a product development setting.

Experience in heavy duty engines for trucks

Strong communication skills with excellent presentation abilities.

Capable of managing multiple projects simultaneously.

Proficient in problem-solving techniques.

Fluency in English is required, with a willingness to learn Dutch.

Automotive knowledge is advantageous.

Wat kun jij van ons verwachten?

A salary based on yours of education and experience

36 holidays per calenderyear

you will work 37.5 hours a week in this position
