

Piping Lead Engineer - Office Poortugaal

[Apply Now](#)

Company: Fluor Corporation

Location: Netherlands

Category: computer-and-mathematical

Job Description

Fluor Consultants BV is focusing on developing long term relationships with customers in revamping, debottlenecking and expanding the production capacity of their existing facilities in the process Industry.

The Bergen op Zoom, Rotterdam and Stein offices provide the full project execution services: from conceptual engineering through detailed design, commissioning and construction support. This includes fabrication, modularization and maintenance. Fluor's target industries are: Oil & GAS, Chemicals, Renewable Energy solutions, life science and advanced manufacturing.

Job description

The Piping Design & Engineering group is a dynamic team in which engineering, design and leadership skills are combined to effectively support our clients. In addition to a solid education focusing on engineering and/or design, a strong set of personal competencies is a prerequisite for success. Being a team player and having an ability to interact effectively with client's organization and others disciplines in our taskforce is essential.

In these projects the Piping design team is responsible for the routing of pipe systems, and the complete lay-out of the plant. E.g. Equipment locations, locations of new structures and

platforms.

Fluor's target industries are Oil & GAS, Chemicals, Renewable Energy solutions, life science and advanced manufacturing. They work within a task force for the realization of multi-discipline projects in close cooperation with vendors and clients to translate functional specifications into technical solutions.

Key Responsibilities

The successful candidate must be able to:

- . Perform design development in several project phases e.g. conceptual design, front-end design, detail engineering and design and plant commissioning for integration of new facilities in revamp type project as well for 'small' grass-root type of projects.
- . Input to Basic Engineering Design Packages and Writing of contractor's scope of work
- . Supervision, planning, organization of the work:
 - Lead /coordinate a piping design team (4-15 people) Assign, monitor and manage the work.
 - Prepare schedules, estimates, manpower forecasts and apply change-risk management.
 - Communicate and align with clients, vendors and other disciplines.
 - Supervise and act as mentor for a group of junior and intermediate level designers.
 - Assign and monitor the work executed in the Fluor global engineering execution centers.
- . Promote and support Value improvements initiatives and Continuous Performance

Improvement

- . Interpret, set-up and mark up of P&ID's
- . Interpret, set-up and mark up Line designation list
- . Participate in design reviews within the Project team
- . Work independently, controls / leads small teams including offshored work
- . Have practical knowledge of field installations
- . Assure quality of work assigned, assure technical integrity of design documents
- . Proactive reporting project status and constraints to Project Management and Department

Manager

Basic Job Requirements

Proven Experience

- . 15-20 years relevant working experience with an engineering contractor, or production company in the process industry.

- . Extensive practical field experience
- . Working knowledge of and ability to interpret Piping and Instrumentation Diagram (P&ID) update master P&ID and piping line list
- . Exhibit understanding of pertinent design codes and governing regulations and industry practices
- . Knowledge of PED requirements

Minimum Requirements

- . MBO / HBO WTB or equivalent
- . Leadership skills
- . Extensive knowledge of piping design
- . Candidates shall be fluent in both Dutch and English. Written and verbal communication with our Clients is as well in Dutch as English.
- . Strong interpersonal skills
- . Willingness to travel
- . Be able to multi-task between several projects
- . Experience within food sector/life sciences is a plus

Fluor can offer:

- . Competitive salary package including a variable profit sharing
- . A fiscal maximized defined contribution pension scheme
- . A flexible work arrangement with the possibility to work from home and save additional vacation days on top of the regular paid vacation days
- . An excellent insurance package in addition to the Dutch social security
- . Excellent development opportunities in a dynamic international project environment.

To be Considered Candidates:

Must be authorized to work in the country where the position is located.
