Building on our past. Ready for the future

Worley is a global professional services company of energy, chemicals and resources experts headquartered in Australia.?

Right now, we're bridging two worlds as we accelerate to more sustainable energy sources, while helping our customers provide the energy, chemicals and resources that society needs now.

We partner with our customers to deliver projects and create value over the life of their portfolio of assets. We solve complex problems by finding integrated data-centric solutions from the first stages of consulting and engineering to installation and commissioning, to the last stages of decommissioning and remediation. Join us and help drive innovation and sustainability in our projects.

Principal Safety Engineer

Job Description:

As a (Process) Safety Engineer in the energy and EPCm sector, you play a crucial role in ensuring safety in the design, sustainable design and technical integrity of our operations.

Your primary responsibility is to identify, assess, and manage process safety and other safety-in-design and environmental risks. This includes (Process) Safety Engineering management, permit applications, technical and process safety, environmental engineering, fire safety, human factors, sustainability, noise control (environmental and workplace), regulatory compliance and of course, being the specialist on a project.

Key Responsibilities:

You support, facilitate, and advise on process safety and other safety-in-design matters, especially in investment projects.

You are the point of contact for process safety and safety-in-design, Environmental and Sustainable design.

You are responsible for facilitating and conducting safety studies such as Process Safety and other Safety, Environmental and Health Studies.

You play a significant role in large projects to ensure that process safety, safety-in-design and sustainability receive appropriate attention.

Qualifications:

Bachelor's degree in Chemical Engineering, Process Safety, or a related field. A Master's degree is preferred.

Familiarity with international, European, and Dutch rules and regulations regarding permitting and Safety in Design.

Ability to report in Dutch to authorities.

Specific knowledge and experience on any other specialist areas such as Noise, Permitting (Environmental), and Fire Safety.

Moving forward together

We want our people to be energized and empowered to drive sustainable impact. So, our focus is on a values-inspired culture that unlocks brilliance through belonging, connection and innovation.

We're building a diverse, inclusive and respectful workplace. Creating a space where everyone feels they belong, can be themselves, and are heard.

And we're not just talking about it; we're doing it. We're reskilling our people, leveraging transferable skills, and supporting the transition of our workforce to become experts in today's low carbon energy infrastructure and technology.

Whatever your ambition, there's a path for you here. And there's no barrier to your potential career success. Join us to broaden your horizons, explore diverse opportunities, and be part of

delivering sustainable change.
