Company: Codit

Location: Netherlands

Category: other-general

About The Job

As a Project Manager, you will cover both the analysis and the general management of our projects. You will:

Be responsible for scope, budget and time management, and will keep track of deadlines and deliverables. Your organizational skills will help you to manage multiple projects at the same time.

As a Functional Analyst, take overall functional responsibility for functional design. You will analyze business processes and transform them into functional software specifications.

Set up and lead several workshops to acquire the information needed from your stakeholders.

Determine the right technologies to solve specific challenges (e.g. security, messaging, compute, storage, database), in collaboration with the architect.

Collaborate on the technical analysis phase with development teams and architects, providing assistance and becoming a functional key player.

Lead the Scrums in the follow-up of projects.

Operate as an inspiring and motivating team lead, coaching your colleagues to deliver successful projects.

Nice to know

In this role, you'll find out how easily you can interact with other technology adepts

throughout the world. You will also be supported by your colleagues in the PM team and everyone within Codit.

Our customers vary from national to international organizations, so you might get the opportunity to work within an international context. As our solutions are directly connected to the core activity of the customer, you'll get acquainted with a lot of other business industries.

You will get the opportunity to work with the newest Microsoft technologies, including cloud solutions. Did you know Codit is a valuable contributor to the development of new Microsoft technologies?

About You

You have at least 3-5 years of experience in a similar role as Project Manager in an IT environment.

You have a Bachelor's or Master's degree in IT or equivalent through experience.

You demonstrate project management experience. Knowledge of Agile/Scrum/Prince 2 and other methodologies is considered to be a plus.

You have good conceptual knowledge of the IT stack. Knowledge of cloud technology, API, IoT etc. is a plus.

You enjoy working for different customers and you know how to inspire them.

You will communicate intensively with customers and other stakeholders, so solid communication skills will come in handy.

You take responsibility and motivate your colleagues.

You're a problem solver with a 'getting things done' attitude. You are punctual and can handle a certain level of stress.

You live in the Netherlands. You are fluent in English. Knowledge of Dutch is an asset.
