

Technical Specialist Requirements Management

[Apply Now](#)

Company: Damen

Location: Vlissingen

Category: computer-and-mathematical

About us

Get on board with Damen Naval, along with more than 1,200 professionals based in The Netherlands, Romania, and Germany. We are the naval division of the family-owned Damen Shipyards Group which employs 12,000 professionals globally. Damen Naval designs and builds advanced naval vessels for customers all over the world. With a passion for technological innovation and sustainable solutions, we continue to push the boundaries in naval shipbuilding. You can be part of our team! Are you ready for duty?

The role

As Technical Specialist Requirements Management, you play a key supporting role in the design and creation process of highly advanced and complex naval vessels. While Engineering teams work independently on very specific subsets of the complete vessel, they all heavily rely on a single source of requirements to validate the success of the overall product. You manage and maintain the data model containing all these, up to 30 thousand, individual requirements in our requirements management tool IBM Rational DOORS. You provide each Engineering team with an up-to-date overview of the requirements and its status of completion. The Engineers also rely on your overview to keep them updated about the status of adjacent or interdependent subsets allocated to other Engineering teams. As you work from the single source of requirements and its statuses, you will also provide strategic insights and reports about the overall status of the end-to-end design process.

Key accountabilities

As Technical Specialist Requirements Management, you will be:

Setting up, configuring, and maintaining the requirements model in DOORS using DXL.

Ensuring the data model is up to date by liaising with Engineering teams and Project Managers.

Creating regular and one-off dashboards, reports and queries in DOORS using DXL.

Optimizing the delivery of up-to-date insights through automating queries and update processes.

Skills & experience

As Technical Specialist Requirements Management, you need to have:

Experience (professional or internship) with requirements management/Systems engineering processes.

Ability to devise creative solutions for specific and complex queries.

Willingness to learn DXL, the syntax of DOORS, to automate these queries.

Bachelor's degree, preferably in Software Engineering or a related discipline.

Experience working as part of a collaborative Scrum/Agile team.

Experience with version control software (Gitlab).

Good command of the English language both verbal and written and ideally also Dutch.

Excellent antecedents as a pre-employment security screening and investigation are a part of the recruitment procedure (given the military nature of our projects).

Permanent EU citizenship and passport are both required and candidates with NL/EU (work) visa or with both an EU and non-EU nationality and/or passport are not eligible in accordance with the requirements imposed by the military nature of our projects.

What we offer

At Damen Naval, we highly value our employees, and we will support your professional and personal development. We also provide our employees with:

A competitive salary and 8% holiday pay.

27 holidays and 13 ADV days.

Travel allowance of 23 cents per kilometre.

PME-pension arrangement with an employer contribution of 60%.

Profit sharing based on company results.

Working from home policy and other benefits including a bicycle plan and company fitness.

Other

Are you interested in the position of Technical Specialist Requirements Management, kindly submit your application along with your CV and motivation letter, along with an indication of: Your (preferred) monthly gross salary based on fulltime work.

Availability (fulltime / part-time / number of hours).

Notice period / possible starting date.

For more information about the vacancy or Damen Naval, please visit the website, theor call the Corporate Recruitment department on +31 (0)118- 485 000.

Please note that due to the military nature of our projects, only candidates who have permanent EU nationality can be considered for vacancies at Damen Naval. Unfortunately, we are not allowed to process candidates who (also) have a non-EU passport or nationality. A pre-employment and security screening and investigation form part of the recruitment process.

Damen Naval does not approve commercial, contractor and/or agency or other commercial use of this advertisement. Proposing candidates without invitation is not appreciated and they will not be considered. #LI-DNS1
