

## Technician Maintenance

[Apply Now](#)

Company: Trinamics

Location: Netherlands

Category: computer-and-mathematical

### Introductie

What if you could work in a dynamic environment in the world of packaging for the food industry? And what if you could develop yourself as all-round technician with various courses and therefore grow within the company? Here's your opportunity!

### Functieomschrijving

As an allround maintenance technician, you will be responsible for the electrical, mechanical, and PLC aspects of all machines. You will be available to address technical inquiries and provide support to our production team. Working alongside a team of 4 allround technicians, with the guidance of the Technical Service Coördinator, you will tackle technical issues, conduct preventive and corrective maintenance, implement process improvements, and mentor junior colleagues.

### Key Responsibilities

Resolve (complex) technical issues

Perform preventive and corrective maintenance

Implement process improvements

### About the company

This company operates as a producer of vacuum-formed plastic packaging for the food industry. We specialize in the development, production, and inventory management of packaging. Located in Steenberg (NB) near Antwerp, Bergen op Zoom, and Rotterdam, they have a large production and distribution capacity. In recent years, they have experienced

significant growth nationally and internationally within other segments of the food industry.

### **Wat verwachten we van jou?**
