Data Driven Proposal Engineer for Environmental Projects

DEME Environmental is a global leader in providing innovative and sustainable solutions for complex environmental challenges. We offer a wide range of services, including dredging, land reclamation, soil remediation, water treatment, waste management, renewable energy, and marine engineering. We work with clients from various sectors, such as energy, mining, construction, and government, to deliver projects that create value for people and the planet.

We are looking for a data analyst to join our Masterdesk. Masterdesk supports the preparation and submission of competitive bids for environmental projects and gives assistance to all projects in execution. As a data analyst, you will be responsible for collecting, processing, analyzing, and presenting data from various sources, such as our soil washing installations, water treatment plants, technical specifications, and environmental regulations. You will also

closely collaborate with other departments, such as execution, R&D and finance, to ensure the quality and accuracy of the data.
