## Trainee/Internship Position (machine Learning /Ai)

[Apply Now](#)

Company: GeoSignum

Location: Delft

Category: computer-and-mathematical

### Trainee/Internship Position

GeoSignum is currently looking for a highly skilled and enthusiastic team member who has a background in computer science, applied mathematics, Geomatics/geo-informatics, computer vision, Informatics, Artificial Intelligence or similar fields.

### About Us

GeoSignum is a high-tech start-up company based in Delft and member of the YES!Delft business incubator. GeoSignum develops unique software solutions to automatically detect, extract and map geographical objects and features from 3D LiDAR datasets captured from various platforms (Mobile or Airborne) using the state of the art 3D computer vision, advanced data processing and machine learning techniques.

### About You

You should have exceptional analytical, mathematical (3D geometry, numerical methods, algorithms) and coding skills, with the ability to work in a team in a high-tech start-up environment.

### Responsibilities

Assist and implement specific 3D LiDAR data processing applications (machine learning/Deep learning) and test our software.

### Requirements

The ideal candidate will have:

Affinity with OO C++ or Python.

Ability to write clear and scalable codes,

Strong understanding of data structures and algorithms.
